

FISCAL NOTE

The fiscal impact, in the form of a potential increase in excise tax on wine shipments into Wyoming, is indeterminable.

This bill modifies the current limitation on the shipment of wine to any one household from 18 liters in any 12 month period to 36 liters in any 12 month period.

The fiscal impact is indeterminable, because it is unknown how much more wine will be purchased by Wyoming consumers through the direct ship program.

Although there may be an increase in wine purchases by consumers through the direct ship program if this bill passes, excise tax collections may not increase if consumers are buying less wine from local retailers.
