8

9 "(k) A ski area operator shall mark hydrants, water pipes
10 and all other man-made structures on slopes and trails which are
11 not readily visible to skiers under conditions of ordinary
12 visibility from a distance of one hundred (100) feet and shall
13 adequately and appropriately cover the structures with a shock-
14 absorbent material that will lessen injuries. Any type of marker
15 shall be sufficient under this subsection including but not
16 limited to wooden poles, flags or signs if the marker is visible
17 from a distance of one hundred (100) feet and if the marker
18 itself does not constitute a serious hazard to skiers. As used
19 in this subsection "man-made structures" shall not include
20 variations in steepness or terrain, whether natural or as a
21 result of slope design, snowmaking or grooming operations,
22 including but not limited to roads, catwalks and other terrain
23 modifications.
24

25 (m) Whenever maintenance equipment is being employed to
26 maintain or groom any ski slope or trail while the ski slope or
27 trail is open to the public, the ski area operator shall place
28 or cause to be placed a conspicuous notice to that effect at or
29 near the top of that ski slope or trail. This subsection shall
30 not apply to maintenance equipment transitioning to or from a
31 maintenance or grooming project."
