

FISCAL NOTE

No significant fiscal or personnel impact in the forecast period.

Description and source of expenditure decrease in the future:

Future license plate production will be reduced to making only one (1) plate per number as opposed to the current two (2) plates. The Department of Transportation has made all sets for the current license plate issue. There is minimal impact to the Department of Transportation until the next new license plate issue, which the creation of those plates would start during fiscal year 2023 to be issued in 2025. The currently issued license plates are already printed and either on vehicles or in County Treasurer's offices pending issuance. The estimated future savings per year for the Department of Transportation is \$200,477.
