

**FISCAL NOTE**

This bill amends W.S. 21-4-302(e) to remove the reporting requirement regarding an assessment of readiness and academic performance of pupils participating in a school district preschool program. The Wyoming Department of Education (WDE) anticipates a reduction of \$3,000 per year in expenditures for contract services due to this change. The WDE indicates there is no significant fiscal impact from the other amendments in this bill, but there would be a significant reduction in administrative burden.
