

**FISCAL NOTE**

No significant fiscal or personnel impact.

2019 Session Laws, Chapter 146 requires the Department of Enterprise Technology Services (ETS) to establish uniform state payment processor services and reporting as well as authorizes contracting. This bill would require the statewide contract to include a uniform rate or fee and for agencies to use the fee to pay for the associated payment processing cost, pass the fee on to the payee, and to clearly disclose the fees.

The Governor's 2021-2022 budget recommendation for ETS includes an exception request of \$150,000 in Internal Service funds for funding the statewide payment processor contract required by 2019 Session Laws, Chapter 146.
