

FISCAL NOTE

This bill would increase the amount that may be expended, with legislative approval, from the State Parks Account from 30% to 60% of the funds in the account in any fiscal year. This bill would also modify how these funds could be expended to include administrative and operational costs associated with outdoor recreation areas and facilities.

Assuming estimated revenue deposits of \$3.3 million per fiscal year to the State Parks Account, this bill would allow an additional expenditure of approximately \$1.0 million each fiscal year (\$2.0 million per biennium) from the State Parks Account, with legislative approval.
