

FISCAL NOTE

The fiscal impact to the judicial system is indeterminable due to an unknown number of cases.

The Supreme Court notes that email filings will have a charge of one dollar (\$1.00) per page submitted. The courts would then be required to provide paper, toner and staff time to handle printing paper copies of documents as necessary. As the Supreme Court would not know how many cases and documents will be filed by email, it is not feasible to accurately estimate any revenue increase and offsetting expenditure increase impacts of this bill.
