

FISCAL NOTE

The fiscal impact, in the form of a potential expenditure increase by the Game and Fish Department from promulgating rules, is indeterminable.

The Game and Fish Department (Department) states they could have a potential expenditure increase from additional personnel time spent on the development and implementation of rules and regulations, as well as time collaborating, evaluating, implementing and monitoring any agreements that may occur pursuant to the bill. The Department also states that the extent rules and regulations will be developed is uncertain and therefore cannot be estimated. In addition, if rules and regulations are promulgated there is no way to determine how many requests will be made by the tribes, nor how much Department personnel time will be required to assist in the development, implementation and monitoring of each subsequent agreement.
