6 **"99-99-210. Projects authorized; financing; excess water.**  
7

8 (g) All effluent from the city of Cheyenne's sewage  
9 treatment plant resulting from Stage II municipal water (Stage II  
10 effluent) shall be assigned to and marketed by the Wyoming water  
11 development commission until the city of Cheyenne develops the  
12 ability and the need to recycle or use that water for municipal  
13 purposes. Sale contracts entered into by the commission shall be  
14 administered by the commission. The board shall provide thirty-  
15 seven and three-tenths percent (37.3%) of the proceeds of the sale  
16 of Stage II effluent to the city of Cheyenne for its use. The water  
17 development commission may withdraw up to sixty-two and seven-  
18 tenths percent (62.7%) of the Stage II effluent from sale and the  
19 city of Cheyenne may withdraw up to thirty-seven and three-tenths  
20 percent (37.3%) of the Stage II effluent from sale. If either the  
21 city or the commission withdraws any portion of its share of Stage  
22 II effluent from the market its share of revenues generated by  
23 sale of the remainder shall be reduced proportionately. The sale  
24 or withdrawal from sale of Stage II effluent shall not be  
25 accomplished without consultation among the commission, the city  
26 and the state engineer. Because the effluent affected hereby is a  
27 by-product of the Stage II dams and pipeline projects, there are  
28 no restrictions on the city of Cheyenne's use of its share of the  
29 revenues generated by the sale of Stage II effluent.". ROTHFUSS
